Fall Headcount Enrollments in Nebraska Institutions of
Postsecondary Education
1975 through 1980:

A Six Year Summary

Total fall Headcount enrollments of the Nebraska institutions of postsecondary education were almost 20 percent higher in the fall of 1980 than they were in the Fall of 1975, increasing from 75,128 to 90,142. While the percentage increase for the University of Nebraska, Nebraska State Colleges and Nebraska Independent Colleges and Universities were approximately 4 percent, 17 percent and 17 percent, respectively, the increase for the Technical Community College sector was 78 percent.

The number of students enrolled full-time increased from 51,753 in 1975 to 56,096 in 1980, representing an increase of over 8 percent. The proportion of the total enrollment made up by full-time students declined from 69 percent in 1975, to 62 percent of the total enrollment in 1980. The balance of the 20 percent increase in total enrollment between 1975 and 1980 was due to a 46 percent increase in the number of students enrolled on a part-time basis. In 1980, there were 10,671 more part-time students than in 1975 and these students represented 38 percent of the total enrollment in 1980, compared to 31 percent of the total enrollment in 1975.

Most of the change in the mix between full-time and part-time students is accounted for by the technical community colleges. In 1975, 66 percent of the total enrollment in the technical community colleges was full-time, where in 1980, only 38 percent of the students in the public two year institutions were reported as being full-time. This is primarily attributed to only a 4 percent increase in the number of full-time students in 1980, over 1975 enrollments, where part-time enrollments increased 219 percent in the technical community colleges.

For the University of Nebraska, Nebraska State Colleges, and Nebraska Independent College and University sectors, the percentage changes between 1975 and 1980 full-time and part-time enrollments were +7 and -2 percent, +14 and +26 percent, and +11 and +42 percent, respectively. The proportion of the total enrollment made up by full-time enrollees declined for the state colleges and independent institutions (72 to 70 percent and 83 to 79 percent respectively), but increased for the University of Nebraska, increasing from 64 percent of the total enrollment to 66 percent.

Compared to the fall 1975 total enrollment, the number of undergraduate students in the fall of 1980 was 24 percent greater. The largest increase in undergraduate enrollment was in the Technical Community College Sector where all students are classified as undergraduates. The 78 percent increase in undergraduate enrollments in the Technical Community Colleges compares to an undergraduate enrollment increase of 5.6 percent for the University of Nebraska, 21 percent increase for the Nebraska State Colleges and 19 percent increase for the fourteen Nebraska independent colleges and universities.

Enrollment decreases were reported for students at the graduate and first professional levels. In the fall of 1980, the University of Nebraska reported some 3 percent fewer graduate students and 8.5 percent fewer students enrolled at the first-professional level than were reported in the fall of 1975. The number of graduate students enrolled in the four state colleges increased by 21 graduate students from 1975 to 1980 (1,989 to 2,010). While graduate student enrollment in the independent colleges and universities was 7 percent fewer in 1980 than in 1975, the number of first-professional students enrolled in these institutions remained essentially unchanged (increasing by 1.4%).

Some changes have occurred between 1975 and 1980 in distribution of students between the three levels of enrollments. In 1975 the percentage of all enrollments made up by undergraduates was 84 percent, in 1980, undergraduates represented approximately 87 percent of the total enrollment. In 1975 and 1980, respectively, the proportion of the total enrollment represented by graduate students declined from 12 percent to 9 percent, and the proportion of first professional students declined from being almost 4 percent of the total enrollment to a little over 3 percent.

The number of women enrolled and the percentage of the total enrollment that are women, are both increasing. In 1975, the 32,252 women enrolled represented 43 percent of the total enrollment. However, in 1980, the 44,450 women represented 49 percent of the total enrollment. The percentage of women in 1975 and 1980 for the University of Nebraska were 41 and 46, Nebraska State Colleges were 52 and 58, for the Nebraska Technical Community Colleges 38 and 50, and for Nebraska Independent Colleges and Universities 45 and 50 percent.

While enrollments were not reported according to ethnic categories in 1975, they were in 1978 and 1980. In the fall of 1978 there were 82,094 students enrolled, in the fall of 1980 the enrollment was 90,142. The following, by ethnic category is the number of students enrolled and the percentage of the total enrollment of each ethnic category for 1978 and 1980 respectively: Non-resident alien, 1,291 (1.6%), 1,320 (1.5%); Black Non-Hispanic, 2,509 (3.1%), 2,576 (2.8%); American Indian or Alaskan Native, 285 (0.3%), 562 (0.6%); Asian or Pacific Islander, 475 (0.6%), 611 (0.7%); Hispanic, 775 (0.9%), 883 (1.0%); White Non-Hispanic, 76,759 (93.5%), 84,190 (93.4%).

PREFACE

The headcount enrollment data reported in this report were reported by the Nebraska institutions of postsecondary education on the Higher Education General Information Survey (HEGIS). The HEGIS enrollment report is part of a series of reports institutions file with the National Center for Education Statistics of the U.S. Department of Health, Education, and Welfare each fall. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution of the HEGIS reporting forms to the institutions, the collection and return of completed reports for the National Center for Education Statistics (NCES).

The bulk of these data (enrollments for Fall 1975 through Fall 1980), were taken from the following HEGIS reports.

- Fall 1980: "Fall Enrollment and Compliance Report of Institutions of Higher Education - 1980" (O.E. Form 2300-2.3a, b), summary sheet, columns 13 and 14.
- Fall 1979: "Fall Enrollment in Institutions of Higher Education - 1979" (NCES Form 2300-2.3) summary sheet, columns 13 and 14.
- Fall 1978: "Fall Enrollment and Compliance Report of Institutions of Higher Education - 1978" (O.E. Form 2300-2.3), summary sheet, columns 13 and 14.
- Fall 1977: "Fall Enrollment in Institutions of Higher Education - 1977" (NCES Form 2300-2.3), columns 13 and 14.
- Fall 1976: "Fall Enrollment and Compliance Report of Institutions of Higher Education - 1976" (O.E. Form 2300-2.3), summary sheet, columns 13 and 14.
- Fall 1975: "Opening Fall Enrollment in Higher Education - 1975" (O.E. Form 2300-2.3), appropriate lines and columns; some summations were made.

These data were sent to each Nebraska institution of postsecondary education for verification. The data reported herein reflect changes made by the institutions as a result of the process of verification. Those data reported for Fall 1973 and Fall 1974 were taken from the Commission's report entitled: Enrollment Trends in Postsecondary Education for the State of Nebraska, 1967-1978, dated June 2, 1978.

It should be noted that while each collegiate postsecondary institution annually completes the Higher Education General Information Survey, in 1978, the Nebraska College of Business, a Private Vocational School, participated in the Survey on an experimental basis. This experiment was conducted to determine the problems encountered, appropriateness, and general capability of private vocational schools which offer associate level degree programs to provide the same information. This single year reporting by the Nebraska College of Business does not imply that other Private Vocational Schools were requested to provide the information or that this reporting in any way represents the totality of the 67 Private Vocational Schools in Nebraska.

The Commission wishes to acknowledge with appreciation the cooperation and time the institutions devoted to reviewing and verifying the data contained in this report.

III. Commission Reports	34

1. Introduction

Fall headcount enrollment reporting is only one of several types of enrollment that might be used with respect to an institution, several institutions, at the state or national level. Depending upon the question being addressed, the following enrollment counts may be appropriate: fall headcount, unduplicated headcount over a fiscal year, full-time equivalency, etc. Each type of enrollment count tells the reviewer of the statistics something different as usually, in each instance, something different is being examined.

Fall headcount enrollment is normally used as a parameter of trends among and between institutions. The fall period is usually the time in which traditional collegiate institutions experience their peak enrollment period. Thus, by comparing one fall enrollment period with another, the reviewer can get a general understanding of whether the enrollments are increasing and the postsecondary educational enterprise is expanding, or whether enrollments are decreasing and the enterprise is contracting. Changes in student enrollment patterns also may be generally inferred from the fall headcount statistics.

The following three (3) Figures and related Tables show that the postsecondary educational enterprise in Nebraska is generally expanding and is growing in both the public and independent sectors of postsecondary education. While the enrollment in the Fall of 1980 was some 28.5% higher than in the Fall of 1973 (Table No. 2), full-time enrollments only increased a little more than 16% (Table No. 3), while part-time enrollments increased by almost 55% (Table No. 4), over this period. Those students enrolled in degree-credit programs and courses but not carrying sufficient credit hours to be classified as a full-time student, also represent a greater proportion of the total 1980 enrollment than the total 1973 enrollment (increasing from some 31% of the total enrollment in 1973 to some 38% by the Fall of 1980-Table No. 1).

Thus, it appears that increasing numbers of persons are taking advantage of the activities and services offered by the institutions in Nebraska, but an increasing proportion of these persons are doing so on a part-time basis.

DEGREES AND OTHER FORMAL AWARDS CONFERRED BY
NEBRASKA INSTITUTIONS OF POSTSECONDARY EDUCATION

1974-75 Through 1979-80

October, 1981

Degrees and Other Formal Awards Conferred by
Nebraska Institutions of Postsecondary Education
1975 through 1980:

A Six Year Summary

Nebraska institutions of postsecondary education conferred 4% fewer degrees and other formal awards in 1979-80 than in 1974-75, a reduction of 602 degrees, from 14,343 conferred in 1974-75. The two sectors which awarded more degrees in 1979-80 than 1974-75 were the State Colleges and Independent College and University sector, awarding 2% (31) and 6% (159) more degrees at the end of the six year period, respectively. Fewer degrees were awarded by the University of Nebraska and the Technical Community College where the percentage change for the University of Nebraska was -6.89% (471 degrees less), and the Technical Community Colleges -10.5% (321 fewer degrees).

The number of Associate Degrees and Other Formal Awards conferred for programs of two years or less changed over the six year period showing a reduction of 161 degrees or 4% statewide. The University of Nebraska and State Colleges awarded 162 more (+54.55%) and 31 less (-45.59%) degrees respectively, in this level in 1979-80 than in 1974-75. The Technical Community Colleges conferred 321 fewer degrees (-10.50%), and the Independent Colleges and Universities conferred 11 fewer degrees or (-4.35%).

Numerically, the largest difference between 1974-75 and 1979-80, has been at the baccalaureate degree level as the number of bachelor degrees conferred was -8.19% (674) fewer than in 1974-75, from 8,227 to 7,553. The University of Nebraska sector conferred 773 fewer degrees in 1979-80 than in 1974-75 for a decrease of 16.29%. The State Colleges also showed a decrease of 2% or 28 fewer degrees. The Independent Colleges and Universities, however, showed a 6.6% increase or 127 more baccalaureate degrees conferred for this period of time.

The number of master degrees conferred increased by 190 from 1974-75 to 1979-80 statewide, a 25% increase. The University of Nebraska conferred 106 more master degrees for a 9% increase; the State Colleges, 94 more or slightly over a 50% increase, and the Independent College and Universities showed a decrease of almost 7% and conferred 10 fewer degrees than in 1974-75.

Degrees conferred on the first-professional level (medicine, dentistry, law) statewide showed an increase of almost 5%, 803 degrees conferred in 1979-80. The University of Nebraska, however, reported a decrease of 2% or 9 fewer degrees awarded. The Independent Colleges showed a 16 percent increase from 1974-75 to 1979-80, 51 degrees more, from 311 to 362.

The number of Doctorate degrees (Ph.D. and Ed.D) increased by only 2% or 5 degrees from 216 in 1974-75 to 221 in 1979-80.

PREFACE

The information contained in this report was reported by the Nebraska institutions of postsecondary education on the Higher Education General Information Survey (HEGIS). The HEGIS degree and other formal awards report is part of a series of reports institutions annually file with the National Center for Education Statistics of the U.S. Department of Health, Education, and Welfare. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution of the HEGIS reporting forms to the institutions, the collection and return of completed reports for the National Center for Education Statistics (NCES).

The data were taken from the following HEGIS reports.

(NCES Form 2300-2.1)

The raw data reported herein were sent to each Nebraska institution of postsecondary education for verification. The data shown in this report reflects changes made by the institutions as a result of this verification process.

It should be noted that while each collegiate postsecondary institution annually completes the Higher Education General Information Survey, in 1978, the Nebraska College of Business, a Private Vocational School, participated in the Survey on an experimental basis. This experiment was conducted to determine the problems encountered, appropriateness, and general capability of private vocational schools which offer associate level degree programs to provide the same information. This single year reporting by the Nebraska College of Business does not imply that other private vocational schools were requested to provide the information or that this reporting in any way represents the totality of the 67 private vocational schools in Nebraska.

The Commission wishes to acknowledge with appreciation the cooperation and time the institutions devoted to reviewing and verifying the data contained in this report.

IV. Commission Reports	101

I. Introduction

The number of degrees and other formal awards shown in this report are aggregated individual program totals for the respective award levels. For example, the number of baccalaureate degrees reported in the major program area of Architecture and Environmental Design reflects the summation of the degrees conferred in six (6) possible baccalaureate degree programs for this program area: (1) Environmental Design, General, (2) Architecture, (3) Interior Design, (4) Landscape Architecture, (5) Urban Architecture, and (6) City, Community, and Regional Planning. The reviewer of these data is, therefore, cautioned to keep in mind that the program areas shown in this report are major program areas rather than individual programs of study, or majors.

The reports detailed in Section II, shown the number of degrees and formal awards conferred at the following award levels:

1. Degrees and Awards Based on Less than Four Years of Work Beyond High School

There are three (3) parts to this section which are:

- a. Curriculums of at least one year but less than two years
- b. Other Formal Recognition (without Associate Degree) Curriculums of two or more years but less than four years
- c. Associate Degree Curriculums of two or more years, but less than four years

2. Bachelor Degrees Awarded

3. Master's Degrees Awarded

4. First Professional Degrees Awarded in Selected Fields

5. Degrees or Certificates Awarded that are intermediate between the Master's Degree and the Doctor's Degree

6. Doctor's Degrees Awarded

Each of these degree levels has a number of individual programs of study, or student majors, available for institutional reporting. However, as mentioned above, these degree levels are aggregated to the general program area in which these individual programs are classified. In addition, there are a number of different award or degree titles within each degree level. For example, there are Associate of Sciences (A.S.), Associate of Arts (A.A.) and Associate of Applied Science (A.A.S.) degrees reported together under the Associate Degree Level heading. This is especially true for the Bachelor's and Master's degree level sections.

The surveys from which these data were taken also included the number of awards that were conferred to men and to women and by ethnic categories. These data are not shown in this report.

The following tables show in summary the data reported in Section II of this report.

Explanation of Table Numbers 1 and 2

Table Numbers 1 and 2 show by level of degree or other formal award conferred, the number of degrees or awards each institutional sector conferred during the respective reporting period by major discipline groupings.

The degree levels are shown in more detail in the detailed reports in Section III of this report.
